Anti-Foam *CONCENTRATE*

- Ideal for industrial applications, automatic hard floor scrubbers, carpet extraction equipment and wet vacuums.
- Fast acting solution controls foam quickly.
- Silicone emulsion designed for water-based solutions.

Product	Dilution	Code	Size
Concentrate	1:250	40319	18.9L

Anti-Foam is a general purpose concentrated silicone emulsion designed to control foam in most water-based solutions. It is ideal for industrial process defoaming in non-food grade products. Anti-Foam also works equally well in automatic hard floor scrubbers, carpet extraction equipment and wet vacuums.

Directions:

Shake product well.

For industrial or commercial applications: Start with a solution of 1:200 (1 part Anti-Foam to 200 parts water) and adjust up or down depending on results.

For Automatic Scrubbers: Dilute with water at 1:200 (1 part Anti-Foam to 200 parts water). Put product directly into recovery tank. Do not spray directly onto floors.

For carpet extraction equipment: Dilute with water at 1:250 (1 part Anti-Foam to 250 parts water). Put product directly into recovery tank or suck up through vac hose. Increase dilution as necessary. Do not spray directly onto carpets.

Use only as directed. Not for use in food products. Do not use on or near materials not compatible with silicone emulsions.

Handling and Cautions:

Eye Irritant. Do not take internally. Avoid contact with skin and eyes. If in contact with eyes, immediately flush with water for 15 minutes. If in contact with skin, flush with water. Call a physician if irritation develops. If ingested, do not induce vomiting. Contact a physician. READ MATERIAL SAFETY DATA SHEET BEFORE USING PRODUCT.
