# Organic Stain & Odour Remover

- Digests odours and stains from urine, vomit, feces and other organic matter.
- Also controls odours coming from drains and urinals.
- True multi-purpose product ideal for problem solving in every building.

Product	Dilution	Code	Size
Ready-to-Use	RTU	40344	3.78L

A blend of specialized strains of safe-to-use bacteria chosen to produce enzymes that will digest organic matter that causes foul odours. Contains an odour counteractant that removes odours in the air. Use to remove stains from urine, feces, vomit, blood, milk, wine, coffee and other organic matter. Also controls odours coming from drains and urinals.

## Directions:

Around toilets and urinals, dilute 1:8 with water and clean contaminated areas. While still wet, spray areas thoroughly with full strength product. Spray daily until all entrapped odours go away, then treat as needed. To digest odours in urinals, drains and traps, pour 500 ml into trap and leave. Do not flush for a few hours after treatment so that the product has the ability to digest the problem organic matter. To digest odours on carpets and upholstery, dilute product at 1:12 with water. Test for colour fastness by applying some solution in an inconspicuous area. If no dye bleed occurs, spray on affected areas, allow to sit, then blot with a clean dry cloth. Repeat if necessary. Rinse with water then vacuum or absorb all liquid. Do not over wet fabrics. On hard surfaces remove soil such as pet feces or urine, then spray the product full strength. Allow to penetrate, then clean with a mop or cloth. Avoid breathing spray.

## Handling and Cautions:

Caution: Irritant. May irritate eyes. May irritate skin. Do not get in eyes. Do not get on skin or clothing. First aid treatment: Contains live bacteria cultures. If swallowed, call a Poison Control Centre or doctor immediately. Do not induce vomiting. If in eyes, rinse with water for at least 15 minutes. If on skin, rinse well with water. Keep out of reach of children.
